Ozinga Shield
REDUCE WATER PENETRATION AND INCREASE LONG-TERM DURABILITY

Ozinga Shield is an integral concrete sealer that drastically reduces water penetration, increases long-term durability, improves color vibrancy, and starts protecting from day one. Rather than sealing weeks after installation, Ozinga Shield protects like a topically sealed pavement from the day it is poured.

**OZINGA SHIELD IS PERFECT FOR:**
- Driveways
- Patios
- Front walks
- Stoops
- Sidewalks
- Stairs

**OZFLAT:**
- **STRENGTH:** 4,500 psi
- **SLUMP:** 4 - 6"
- **AIR:** 4.5 - 7.5%
- Includes Ozinga Shield
- Perfect for all exterior flatwork
- Meets ACI 318 recommend strength for flatwork in severe freeze-thaw environments
- Excellent workability and enhanced finishing characteristics
- Contains a plant-added internal sealer
- No sealing for the first two years

Place your order today. Contact your Ozinga sales representative or visit ozinga.com.

All ACI and standard concrete placement and jointing practices should be followed in the use of any of the above branded mix designs for optimal performance.
